# **Nostrum Oil & Gas PLC**

Interim management report

For the six months ended 30 June 2021

## **Business review**

Some of the statements in this Interim Financial Report are forward-looking. Forward-looking statements include statements regarding the intent, belief and current expectations of the Group or its officers with respect to various matters. When used in this document, the words "expects," "believes," "anticipates," "plans," "may," "will," "should" and similar expressions, and the negatives thereof, are intended to identify forward-looking statements. Such statements are not promises or guarantees, and are subject to risks and uncertainties that could cause actual outcomes to differ materially from those suggested by any such statements

#### Overview

Nostrum Oil & Gas PLC (the "Company" and together with its subsidiaries the "Group" or "Nostrum") is an independent oil and gas company engaged in the exploration and production of oil and gas products in North-Western Kazakhstan. Nostrum, through its indirectly wholly-owned subsidiary Zhaikmunai LLP, is currently the owner and operator of two fields in Kazakhstan, the Chinarevskoye and Rostoshinskoye fields.

The Group's primary field and licence area, which has been the Group's sole source of production to date, is the Chinarevskoye Field located in the northern part of the oil-rich Pre-Caspian Basin.

The Chinarevskoye Field, approximately 274 square kilometres in size, is located in the West-Kazakhstan Oblast, near the border between Kazakhstan and Russia, and close to the main international railway lines in and out of Kazakhstan as well as to several major oil and gas pipelines. The Group conducts its operations in the Chinarevskoye Field pursuant to a subsoil use licence (the "Licence") and an associated production sharing agreement ("PSA"). Based on the Ryder Scott Report dated 1 January 2021, the estimated gross proved plus probable hydrocarbon reserves at the Chinarevskoye Field were 39 million barrels of oil equivalent ('boe'), of which 15 million barrels was crude oil and condensate, 4.7 million barrels was LPG and 19.3 million boe was sales gas.

Nostrum's operational facilities in the Chinarevskoye Field consist of three gas treatment facilities with a combined capacity of 4.2 billion cubic metres per annum, an oil treatment unit currently with a maximum annual throughput capacity of 400,000 tonnes of crude oil, multiple oil gathering and transportation lines including a 120 kilometre oil pipeline from the field to its oil loading rail terminal in Rostoshi near Uralsk, a 17 kilometre gas pipeline from the field to the Orenburg-Novopskov pipeline, a gas powered electricity generation system, warehouse facilities, storage facilities, an employee field camp and a gas treatment facility.

The first phase of the gas treatment facility, consisting of two gas treatment units, became fully operational in 2011 and has enabled Nostrum to produce marketable liquid condensate (a product lighter than Brent crude oil) and LPG from the gas condensate stream. During 2017, the Company completed an extension to its existing oil pipeline to connect it into the Atyrau-Samara international export pipeline operated by KazTransOil ("KTO pipeline"). Currently the Company exports all of its crude oil via the KTO pipeline. The third train of the gas treatment facility was completed and commissioned in 2019.

Production from the Chinarevskoye field is declining and so Nostrum is focused on identifying additional sources of raw gas to fill the spare capacity in its processing facilities. During 2018, Nostrum entered into binding agreements to process third-party hydrocarbons starting in 2023 delivered by Ural Oil & Gas LLP from the Rozhkovskoye field, which is situated less than 20km from the Chinarevskoye field. Ural Oil & Gas LLP will fund the connection of existing wells at the Rozhkovskoye field to Nostrum's licence area. Thereafter, Nostrum will process all of the hydrocarbons coming into the field. Ural Oil & Gas LLP is a company owned by KazMunaiGas (KMG) (50%), Sinopec (27.5%) and MOL Group (MOL) (22.5%). In July 2021, Zhaikmunai LLP and Ural Oil & Gas LLP agreed to extend the deadline under the Agreements for Ural Oil & Gas LLP 's first delivery of gas and liquid gas-condensate hydrocarbons to Zhaikmunai by approximately six months, from 9 April 2023 to 31 October 2023. The extension was requested by Ural Oil & Gas LLP as a result of circumstances relating to the COVID-19 pandemic. The Group is also working to secure additional agreements to ensure that there is a long-term stream of raw gas from which it can generate significant revenues.

Nostrum also has rights to 100% of the subsoil use related to Rostoshinskoye oil and gas fields in the pre-Caspian Basin to the North-west of Uralsk, which is located approximately 60 to 120 kilometres from the Chinarevskoye field. Zhaikmunai LLP has entered into an agreement for the transfer all of its rights and obligations in relation to the Rostoshinskoye field to a third party, subject to the satisfaction of various conditions precedent including the receipt of all relevant regulatory approvals. Accordingly, no operational activities are planned on this field during 2021 and the Company will make a further announcement on this subject when appropriate.

For the six months ended 30 June 2021

#### **Business strategy**

Nostrum has set a purpose to work as a close-knit and well-integrated team across all disciplines to deliver excellence across the whole of our value chain, with a vision to add value to the region through the utilisation of our state-of-the-art infrastructure hub. We are trustworthy and reliable, take our corporate, social and ecological responsibilities extremely seriously, and are dedicated to the health, safety and wellbeing of our employees.

The Group has been stabilised through significantly reducing the cost base, boosting production with a successful well intervention campaign in summer 2020 and engaging with stakeholders to restructure the debt. We will now seek to pivot towards growth, transition into a multi-asset energy company and shape our future by:

- Delivering on our strategies, a comprehensive and cohesive environmental, social and governance performance and on our promises.
- Optimising production and cost efficiencies and our ability to raise finance in future through a sustainable restructuring of our debt.
- Maximising output from the Chinarevskoye field.

#### Delivering

One of our strategic pillars is focusing on delivering:

- on our strategies to commercialise the spare capacity in our world-class gas processing facilities;
- a comprehensive and cohesive environmental, social and governance performance; and
- on our promises so that we restore investor confidence.

Our 2021 priorities in these areas include advancing ongoing discussions with third parties interested in supplying raw gas to take advantage of the Group's spare capacity, ensuring the safety of employees, contractors and the environment; continuing to roll-out "Golden Rules" and implementing contractor management framework.

#### Optimising

Nostrum is focused on optimising production and cost efficiencies to safeguard both our base business and liquidity. We also seek to optimise our ability to operate successfully in the future through completing a sustainable restructuring arrangement supported by our stakeholders that leaves sufficient headroom for raising further capital for our growth projects. Our priorities for 2021 in this strategic pillar are to complete the restructuring of the Group's debt to a sustainable level that will enable Nostrum to achieve its full potential, and to continue to challenge costs whilst pivoting towards growth and transitioning into a multi-asset energy company. Corresponding KPIs have been set to achieve G&A expenses below US\$11 million level and for operating costs below US\$32 million.

#### Maximising

Nostrum's third strategic pillar is to maximise output from the Chinarevskoye field and adding Proved Developed Producing reserves by exploiting the current low cost per barrel, high-confidence infill opportunities through best-in-class well and reservoir management. This is aimed to be achieved in 2021 through utilisation of workover rigs and other technologies to manage existing production decline in a cost-effective way and continuing the studies to identify viable technologies to mitigate sub-surface risks for future drilling planning.

For the six months ended 30 June 2021

# **Material events**

#### Bond Restructuring

On 31 March 2020, following the collapse in the oil price, the Group announced that it would seek to engage with its bondholders regarding a possible restructuring of the Group's US\$725 million 8.0% Senior Notes due July 2022 and/or its US\$400 million 7.0% Senior Notes due February 2025 (the 'Notes').

In May 2020, the Group appointed Rothschild & Cie as financial advisers and White & Case as legal advisers to assist in the restructuring of the Notes. PJT Partners (UK) Limited were appointed as financial advisers and Akin Gump Strauss Hauer & Feld as legal advisers to an informal ad-hoc noteholder group ("AHG"). In July 2020, the Group announced that it planned to utilise the applicable grace periods for the interest payments due on 25 July 2020 and 16 August 2020 with respect to the Notes. The 30-day grace period was to allow the Company to continue active discussions with the financial and legal advisers to the AHG with a view to entering into a forbearance agreement with the holders of the Notes in relation to those interest payments.

On 23 October 2020 the Company announced that the Company and certain of its subsidiaries (the "Note Parties") had entered into a forbearance agreement (the "Forbearance Agreement") with members of AHG. The forbearance period initially expired at 4 p.m. GMT on 20 December 2020 (the "Initial Expiration Date"), at which time the Initial Expiration Date automatically extended to 4 p.m. GMT on 18 February 2021, on which date it automatically extended again to 4 p.m. GMT on 20 March 2021.

Pursuant to the agreement, members of the AHG agreed to forbear from the exercise of certain rights and remedies that they have under the indentures governing the Notes. The forbearances included agreeing not to accelerate the Notes' obligations as a result of the missed interest payments (or the next missed interest periods if they occur prior to the expiry of the Forbearance Agreement).

The Forbearance Agreement was subject to certain conditions, including:

- Any representation or warranty made by any of the Note Parties under the Forbearance Agreement continuing to be true and complete in all material
  respects as of the date of the Forbearance Agreement;
- The opening of a secured account into which a portion of the missed interest payments was paid. Within 21 days of the effective date of the Forbearance Agreement an amount equal to 30% of the missed interest payments, equating to US\$12,900 thousand, was transferred into the secured account. The amount in the secured accounts was increased by a further transfer of 17.50% of the missed interest payments, equating to US\$7,525 thousand 180 days after the effective date of the Forbearance Agreement. This transfer was made in March 2021. The Company has the ability to make certain withdrawals from the account if its liquidity falls below an agreed level;
- The appointment by the AHG of an observer who shall be entitled to attend and speak, but not vote, at any meetings of the Board or Committees of the Company where certain defined matters are to be discussed;
- The engagement of certain professional and technical advisors on behalf of the AHG;
- The observance by the Company and its subsidiaries of certain operating and other restrictions and limitations; and
- The provision of certain financial and operating information to the advisors of the AHG.

Holders in an aggregate principal amount of \$361,215 thousand of the 2022 Notes and holders in an aggregate principal amount of \$191,258 thousand of the 2025 Notes signed the Forbearance Agreement.

The Company agreed to pay, or procure payment of, certain consent fees in cash ("Consent Fee") to each forbearing holder. At the date of this Interim Management Report, all Consent Fees have been paid. The first Consent Fee for the first 90 days of 29.7866 basis points, totalling US\$3,350,992, was paid on 19 November 2020. The second consent fee of 19.8577 bps, totalling US\$2,233,991, was paid on 22 December 2020. The final consent fee of 9.9288 bps, equating to US\$1,116,990, was paid on 20 February 2021. The consent fees were recorded in the income statement (for more details please see Note 20 ).

On 19 March 2021, by unanimous consent of the AHG, the forbearance period was extended to 20 April 2021. On 20 April 2021, again by unanimous consent of the AHG, the forbearance period was extended to 20 May 2021. In return for the AHG agreeing to extend the forbearance period to 20 April 2021, the Company also agreed to pay in the secured account an amount of US\$1,116,990, equating to 9.9288 bps of the outstanding Notes. This amount was paid into the secured account on 19 March 2021.

On 19 May 2021, the Note Parties entered into a second forbearance agreement (the "Second Forbearance Agreement" and together with the Forbearance Agreement, the "Forbearance Agreements") with the AHG. The Second Forbearance Agreement was valid from the expiry of the Forbearance Agreement, is substantially similar to the Forbearance Agreement and initially expired at 4 p.m. GMT on 21 June 2021, on which date, by unanimous consent of the AHG, the forbearance period was extended to 21 July 2021. On 21 July 2021, again by unanimous consent of the AHG, the forbearance period was extended to 25 August 2021. In connection with the extension of the Second Forbearance Agreement to 25 August 2021, the Company agreed to pay into the secured account established in connection with the forbearance agreement an amount of US\$1,116,990, equating to 9.9288 bps of the outstanding Notes.

As of the date of this interim management report, the Company is working with its advisers and those of the AHG to agree terms for the restructuring of the Notes.

# **Operational and financial performance**

### Results of operations for the six months ended 30 June 2021 and 2020

	For the six months ended 30 June			
In millions of US\$ (unless mentioned otherwise)	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %
Revenue	92.3	92.6	(0.3)	-0.4%
EBITDA*	52.8	38.7	14.1	36.4%
EBITDA margin	57.2%	41.8%	0.2	36.9%
Cash Position	108.1	76.0	32.1	42.2%
Net Debt	1,125.2	1,064.0	61.2	5.8%

 $\ensuremath{^*}$  See EBITDA reconciliation at the end of the section.

#### General note

For the six months ended 30 June 2021 (the "reporting period") the total comprehensive loss amounted to US\$40.8 million, a decrease of US\$12.7 million from US\$53.5 million total comprehensive loss for H1 2020. Revenues remained relatively stable with reduced production in the reporting period versus the same period in 2020 being offset by increased prices achieved to date in 2021 versus 2020. Therefore, the relative decrease in loss is mainly driven by lower cost of sales, general and administrative expenses and selling and transportation expenses, which have been generated by lower production levels but also the continuing impact of the cost-reduction initiatives implemented in 2020. These have been partially offset by higher finance costs and income taxes charged against income as compared to H1 2020. These are explained in more detail below.

#### Overview

The table below sets forth the line items of the Group's consolidated statement of comprehensive income for the six months ended 30 June 2021 and 2020 in US Dollars and as a percentage of revenue.

	For the six months			
In thousands of US Dollars	2021 (unaudited)	% of revenue	2020 (unaudited)	% of revenue
Revenue	92,311	100.0%	92,636	100.0%
Cost of sales	(49,444)	53.6%	(63,881)	69.0%
Gross profit	42,867	46.4%	28,755	31.0%
General and administrative expenses	(5,832)	6.3%	(8,181)	8.8%
Selling and transportation expenses	(12,086)	13.1%	(17,974)	19.4%
Taxes other than income tax	(7,760)	8.4%	(6,819)	7.4%
Finance costs	(53,625)	58.1%	(47,188)	50.9%
Employee share options - fair value adjustment	-	0.0%	373	0.4%
Foreign exchange loss, net	(221)	0.2%	(561)	0.6%
Interest income	112	0.1%	171	0.2%
Other income	3,397	3.7%	1,765	1.9%
Other expenses	(1,278)	1.4%	(1,458)	1.6%
Loss before income tax	(34,426)	37.3%	(51,117)	55.2%
Income tax expense	(6,671)	7.2%	(2,420)	2.6%
Loss for the period	(41,097)	44.5%	(53,537)	57.8%
Currency translation difference	341	0.4%	5	0.0%
Total comprehensive loss for the period	(40,756)	44.2%	(53,532)	57.8%

For the six months ended 30 June 2021

#### Revenue

The Group's revenue decreased by 0.4% to US\$92.3 million for the reporting period (H1 2020: US\$92.6 million).

Oil and condensate revenues improved by \$13.5 million or 23.2% mainly due to the price per barrel achieved. The pricing for all the Group's crude oil, condensate and LPG is, directly or indirectly, related to the price of Brent crude oil. The average Brent crude oil price increased from 40.0 US\$/bbl during H1 2020 to 65.2 US\$/bbl during the reporting period. However, the positive impact of the price improvement on oil and condensate sales was offset by a reduction in the volumes of condensate sold in the reporting period as the decline in production from the field meant that we were not able to form a cargo in June 2021 and so held approximately 220,000 barrels of condensate in inventory at 30 June 2021.

Gas and LPG sales fell by \$13.8 million or 40% due in part to the production decline from the field and also to the weak price achieved for our gas in the reporting period versus H1 2020.

Revenues from sales to the Group's largest three customers amounted to US\$68.0 million, US\$9.6 million and US\$3.7 million respectively (H1 2019: US\$56.5 million, US\$24.6 million and US\$1.6 million).

The Group's revenue breakdown by products and sales volumes for the reporting period and H1 2020 is presented below:

	For the six months ended 30 June			
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %
Oil and gas condensate	71,611	58,141	13,470	23.2%
Gas and LPG	20,695	34,495	(13,800)	(40.0%)
Sulphur	5	-	5	100.0%
Total revenue	92,311	92,636	(325)	(0.4%)
Sales volumes (boe)	2,944,899	4,117,502	(1,172,603)	(28.5%)
Average Brent crude oil price (US\$/bbl)	65	40	25	63.1%

The following table shows the Group's revenue breakdown by export/domestic sales for the reporting period and H1 2020:

	For the six months ended 30 June			
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %
Revenue from export sales	79,137	66,218	12,919	19.5%
Revenue from domestic sales	13,174	26,418	(13,244)	(50.1%)
Total revenue	92,311	92,636	(325)	(0.4%)

#### Cost of sales

	For the six months ended 30 June				
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %	
Depreciation, depletion and amortisation	34,206	41,005	(6,799)	(16.6%)	
Payroll and related taxes	7,194	7,067	127	1.8%	
Repair, maintenance and other services	3,813	5,880	(2,067)	(35.2%)	
Materials and supplies	2,178	1,659	519	31.3%	
Transportation services	1,302	1,254	48	3.8%	
Well workover costs	424	280	144	51.4%	
Environmental levies	114	55	<i>59</i>	107.3%	
Change in stock	1	6,147	(6,146)	(100.0%)	
Other	212	534	(322)	(60.3%)	
Total	49,444	63,881	(14,437)	(22.6%)	

*Cost of sales* decreased by 22.6% to US\$49.4 million for the reporting period (H1 2020: US\$63.9 million). The decrease is primarily explained by decreases in depreciation, repair, maintenance and other services and the impact of change in stock.

Depreciation, depletion and amortisation decreased by 16.6% to US\$34.2 million for the reporting period (H1 2020: US\$41.0 million). Depreciation is calculated applying units of production method. Decrease in depreciation in 2021 in comparison with prior period is a consequence of the impairment charge of US\$244.9 million recognized at the end of 2020. As described in the 2020 Annual Report, this resulted from the further reserves downgrade and respective reflection of the updated future production profiles in the impairment model of the Group as at 31 December 2020.

*Repair, maintenance and other services* decreased by 35.2% to US\$3.8 million for the reporting period (H1 2020: US\$5.9 million). These expenses include services on repairs and maintenance of the facilities, specifically for the gas treatment facility as well as related spare parts and other materials. These costs fluctuate depending on the timing of the periodic scheduled maintenance works (we undertook a significant, planned maintenance programme in April / May 2021) but have also been positively impacted during the reporting period by the cost reduction initiatives introduced in 2020.

For the six months ended 30 June 2021

#### General and administrative expenses

	For the six months ended 30 June				
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %	
Payroll and related taxes	2,842	3,664	(822)	(22.4%)	
Professional services	2,842	2,614	(506)	(19.4%)	
Insurance fees	295	454	(159)	(35.0%)	
Short-term leases	153	339	(186)	(54.9%)	
Depreciation and amortisation	94	338	(244)	(72.2%)	
Communication	91	96	(5)	(5.2%)	
Business travel	53	137	(84)	(61.3%)	
Materials and supplies	47	58	(11)	(19.0%)	
Bank charges	35	47	(12)	(25.5%)	
Other	114	434	(320)	(73.7%)	
Total	5,832	8,181	(2,349)	(28.7%)	

General and administrative expenses decreased by 28.7% to US\$5.8 million for the reporting period (H1 2020: US\$8.2 million). This was mainly driven by US\$0.8 million or 22.4%% decrease in payroll and related taxes from US\$3.7 million during H1 2020 to US\$2.8 million during the reporting period as well as US\$0.5 million decrease in professional services from US\$2.6 million during H1 2020 to US\$2.1 million and reductions in the costs of insurance, short-term leases, depreciation and amortisation and others. As noted above, the reduction in payroll costs arises mainly from effective implementation of cost optimization and a reduction in the headcount across operations.

#### Selling and transportation expenses

	For the six months ended 30 June				
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %	
Transportation costs	5,076	7,048	(1,972)	(28.0%)	
Loading and storage costs	3,103	4,639	(1,536)	(33.1%)	
Marketing services	1,140	3,143	(2,003)	(63.7%)	
Depreciation of right-of-use assets	1,336	1,598	(262)	(16.4%)	
Payroll and related taxes	750	802	(52)	(6.5%)	
Other	681	744	(63)	(8.5%)	
Total	12,086	17,974	(5,888)	(32.8%)	

Selling and transportation expenses decreased by 32.8% to US\$12.1 million for the reporting period (H1 2020: US\$18.0 million), primarily due to a decrease in transportation costs, loading and storage costs, marketing services and other transport related expenses resulting from reduced volumes being sold. Depreciation costs represent costs resulting from recognition of right-of-use assets for rented railway tank cars under IFRS 16.

#### Finance costs

	For the six months ended 30 June				
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %	
Interest expense on borrowings	46,896	46,520	376	0.8%	
Other finance costs	6,034	57	5,977	10,486.0%	
Unwinding of discount on amounts due to Government of Kazakhstan	381	278	103	37.1%	
Unwinding of discount on lease liability	174	255	(81)	(31.8%)	
Unwinding of discount on abandonment and site restoration provision	140	78	62	79.5%	
Total	53,625	47,188	6,437	13.6%	

*Finance costs* increased by 13.6% to US\$53.6 million for the reporting period (H1 2020: US\$47.2 million) mainly due to increase in other finance costs primarily represented bondholder consent fees in the amount of US\$2.9 million and advisor fees of US\$3.0 million incurred by the Group in the reporting period in relation to the Forbearance Agreements and ongoing discussions with bondholders regarding a possible restructuring of the Notes. For more details see Note 1 to the interim condensed consolidated financial statements. The Group continues to accrue interest on the Notes but has not paid any interest in respect of the Notes since February 2020.

For the six months ended 30 June 2021

#### Taxes other than income tax

	For the six months ended 30 June			
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)	Variance	Variance, %
Royalties	3,457	3,319	138	4.2%
Export customs duty	3,560	2,772	788	28.4%
Government profit share	738	727	11	1.5%
Other taxes	5	1	4	400.0%
Total	7,760	6,819	941	13.8%

*Royalties*, calculated based on production and market prices for the different products, increased by 4.2% to US\$3.5 million for the reporting period (H1 2020: US\$3.3 million), which corresponds to relevant slight change in the value of hydrocarbon sales.

*Export customs duty* on crude oil increased by 28.4% to US\$3.6 million for the reporting period (H1 2020: US\$2.8 million), in line with the increase in the value of export sales subject to export duties.

Government profit share increased by 1.5% to US\$0.7 million for the reporting period (H1 2020: US\$0.7 million), which corresponds to the change in revenues.

#### Other

Income tax expense increased by US\$4.3 million to US\$6.7 million for the reporting period (H1 2020: US\$2.4 million). The increase in income tax expense is primarily driven by a higher deferred tax expense in the current period. This is caused by a relatively faster tax depreciation of the oil & gas assets as compared to their depreciation for the purpose of IFRS financial statements.

#### Liquidity and capital resources

During the reporting period, Nostrum's principal sources of funds were cash from operations. Following the signing of the Forbearance Agreements, the Group's liquidity requirements primarily relate to funding capital expenditures and working capital requirements.

#### Cash Flows

The following table sets forth the Group's consolidated cash flow statement data for the reporting period and H1 2020:

	For the six months ended 30 June	
In thousands of US Dollars Notes	2021	2020
	(unaudited)	(unaudited)
Cash and cash equivalents at the beginning of the period	78,583	93,940
Net cash flows from operating activities	46,295	46,991
Net cash used in investing activities	(11,639)	(18,677)
Net cash used in financing activities	(5,397)	(46,467)
Effects of exchange rate changes on cash and cash equivalents	212	(87)
Cash and cash equivalents at the end of the period	108,054	75,700

#### Net cash flows from operating activities

Net cash flow from operating activities was US\$46.3 million for the reporting period (H1 2020: US\$47.0 million) and was primarily attributable to:

- loss before income tax for the reporting period of US\$34.4 million (H1 2020: loss before income tax of US\$51.1 million), adjusted by a non-cash charge for
  depreciation, depletion and amortisation of US\$35.6 million (H1 2020: US\$42.9 million) and finance costs of US\$53.6 million (H1 2020: US\$47.2 million).
- a US\$6.1 million increase in working capital (H1 2020: US\$10.1 million decrease) primarily attributable to an increase in prepayments and other current
  assets of US\$0.3 million (H1 2020: a decrease of US\$3.5 million), an increase in trade payables of US\$0.5 (H1 2020: a decrease of US\$8.6 million), an
  increase in trade receivables of US\$5.0 million (H1 2020: a decrease of US\$16.8 million) and a decrease in inventories of US\$1.1 million (H1 2020: a
  decrease of US\$4.8 million).
- income tax paid of US\$2.3 million (H1 2020: US\$1.6 million).

#### Net cash used in investing activities

Net cash used in investing activities for the reporting period was US\$11.6 million (H1 2020: US\$18.7 million). This mainly represented payments made in the period in respect of the well workover programme and other surface infrastructure projects of US\$2.9 million (H1 2020: US\$9.1 million). Also, cash used in investing activities included transfers to the secured account of US\$8.6 million in accordance with the Forbearance Agreements (H1 2020: payments of US\$9.0 million made in the period in respect of the activities carried out in 2019 including completion of well drilling and workovers programme, termination of drilling contracts, as well costs associated with the third gas treatment unit).

#### Net cash used in financing activities

Net cash used in financing activities during the reporting period totalled US\$5.4 million (H1 2020 US\$46.5 million), and mainly represented the payment of US\$3.8 million bondholder consent fees and advisor fees incurred by the Group in relation to the Forbearance Agreements and ongoing discussions with bondholders regarding a possible restructuring of the Notes, as well as payment of US\$1.4 under finance lease liabilities recognized in accordance with IFRS 16 (H1 2020: payment of US\$43.0 million of the finance costs on the Notes and payment of US\$3.2 under finance lease liabilities recognized in accordance with IFRS 16).

#### **Capital commitments**

As at 30 June 2021, the Group had contractual capital commitments in the amount of US\$6.9 million (31 December 2020: US\$6.2 million), mainly in respect to the Group's oil field activities.

#### Primary factors affecting results of operations

The primary factors affecting the Group's results of operations during the reporting period are the following:

#### Pricing

The pricing for all of the Group's crude oil, condensate, dry gas and LPG is, directly or indirectly, related to the price of Brent crude oil. During the reporting period the price of Brent crude oil experienced significant fluctuations. According to Bloomberg, international Brent oil prices varied between a low of approximately US\$9.12 per barrel and a high of approximately US\$70.25 per barrel in the first half of 2020, and between US\$50.56 per barrel and US\$76.60 per barrel during the reporting period.

	For the six months ended 30 June		
	2021	2020	
Average Brent crude oil price (US\$/bbl)	65.2	40.0	

The Group has previously hedged against adverse oil price movements during times of considerable non-scalable capital expenditure. Whilst Nostrum closely monitors the hedging market, no new hedge agreements were entered into during the reporting period nor H1 2020.

#### Cost of sales

The Group's oil and gas prices are based on a mix of fixed and quotation pricing and therefore Nostrum's ability to control costs is critical to its profitability. Nostrum's cost of sales comprises various costs including depreciation of oil and gas properties, repair, maintenance and other services, payroll and related taxes, materials and supplies, other transportation services, environmental levies, and well workover costs.

Depreciation and amortisation costs represent 69.2% of total cost of sales for the reporting period (H1 2020: 64.2%). These costs fluctuate according to the level of Nostrum's proved developed reserves, the volume of oil and gas it produces and the net book value of its oil and gas properties.

Repair, maintenance and other services are related to the repair and maintenance of the Group's infrastructure, including the gas treatment facility but do not include ongoing repair and maintenance of production and exploration wells. These costs represent 14.5% of the total costs of sales (H1 2020: 11.1%) and fluctuate depending on the planned works on certain objects.

Well workover costs are related to ongoing repair and maintenance of production and exploration wells. These costs, during the periods under review, have represented as a percentage of total cost of sales 0.9% and 0.4% for the six months ended 30 June 2021 and 2020, respectively.

#### Finance costs

Finance costs in the reporting period comprised interest expenses in relation to the Notes, other finance costs, finance charges under finance leases, as well as unwinding of the discount on amounts due to the Kazakh Government and unwinding of the discount on abandonment and site restoration liabilities. Capitalised borrowing costs (including a portion of the interest expense and amortisation of the arrangement fees) amounted to US\$0.1 million in the reporting period (H1 2020: US\$0.2 million). Non-capitalised interest amounted to US\$46.9 million in the reporting period (H1 2020: US\$46.6 million).

#### Royalties, Government share and taxes payable pursuant to the PSA

Nostrum operates and produces pursuant to the PSA. The PSA has, during the periods under review, and will continue to have both a positive and negative effect on Nostrum's results of operations as a result of (i) the tax regime applicable to Nostrum under the PSA (discussed below) (ii) increasing royalty expenses payable to the State, (iii) the share of profit oil and the share of gas that Nostrum pays to the State and (iv) the recovery bonus payable to the State.

Under the PSA, the Kazakh tax regime that was in place in 1997 applies to the Group for the entire term of the PSA and the Licence. As to VAT and social tax, the regime that was in place as of 1 July 2001 applies. As of 1 January 2009, the new Tax Code became effective and introduced a new tax regime and taxes applicable to subsoil users (including oil mineral extraction tax and historical cost). However, the Tax Code did not supersede the previous tax regime applicable to PSAs entered into before 1 January 2009, which continue to be effective under Articles 308 and 308-1 of the Tax Code. Despite the stabilisation clauses (providing for general and tax stability) provided for by the PSA, in 2008, 2010 and again in 2013, Nostrum was required to pay new crude oil export duties introduced by the Kazakh Government. Despite Nostrum's efforts to show that the new export duties were not applicable to it, the State authorities did not accept this position and Nostrum was required to pay the export duties.

For the six months ended 30 June 2021

For the purposes of corporate income tax from 1 January 2007, the Group considers its revenue from oil and gas sales related to the Tournaisian horizon as taxable revenue and its expenses related to the Tournaisian horizon as deductible expenses, except those expenses which are not deductible in accordance with the tax legislation of Kazakhstan. Assets related to the Tournaisian reservoir that were acquired during the exploration phase are then depreciated for tax purposes at a maximum rate of 25.0% per annum. Assets related to the Tournaisian reservoir that were acquired after the commencement of the production phase are subject to the depreciation rate in accordance with the 1997 Kazakh tax regime, which is between 5% and 25% depending on the nature of the asset. The Kazakhstan Ministry of Energy approved an extension to the Chinarevskoye exploration period on 11 March 2016, with the exploration period extended until 26 May 2018. Assets related to the other horizons will depreciate in the same manner as those described above for the Tournaisian reservoir.

Under the PSA, Nostrum is obliged to pay to the State royalties on the volumes of crude oil and gas produced, with the royalty rate increasing as the volume of hydrocarbons produced increases. In addition, Nostrum is required to deliver a share of its monthly production to the State (or make a payment in lieu of such delivery). The share to be delivered to the State also increases as annual production levels increase. Pursuant to the PSA, the Group is currently able to effectively deduct a significant proportion of production (known as Cost Oil) from the sharing arrangement. Cost Oil reflects the deductible capital and operating expenditures incurred by the Group in relation to its operations. Royalties represented 44.5% of total taxes other than income tax for the reporting period (H1 2020: 48.7%). As for the government profit share, it represented 9.5% of total taxes other than income tax for the reporting period (H1 2020: 10.7%).

#### Alternative performance measures

In the discussion of the Group's reported operating results, alternative performance measures ("APMs") are presented to provide readers with additional financial information that is regularly reviewed by management to assess the financial performance or financial health of the Group, or is useful to investors and stakeholders to assess the Group's performance and position. However, this additional information presented is not uniformly defined by all companies including those in the Group's industry. Accordingly, it may not be comparable with similarly titled measures and disclosures by other companies. Certain information presented is derived from amounts calculated in accordance with International Financial Reporting Standards ("IFRS") but is not itself an expressly permitted IFRS measure. Such measures should not be viewed in isolation or as an alternative to the equivalent IFRS measure.

#### EBITDA

EBITDA is defined as the results of operating activities before depreciation and amortisation, share-based compensation, fair value gains and losses on derivative instruments, foreign exchange losses, finance costs, finance income, non-core income or expenses and taxes, and includes any cash proceeds received or paid out from hedging activity. This metric is relevant as it allows management to assess the operating performance of the Group in absence of exceptional and non-cash items.

		For the six months ended 30 June		
In thousands of US Dollars	2021 (unaudited)	2020 (unaudited)

# **Related parties and related party transactions**

The following is a description of the material transactions with related parties to which the Company or its subsidiaries are a party. The Company believes that it has executed all transactions with related parties on terms no less favourable to the Group than those it could have obtained from unaffiliated third parties.

Save as disclosed in the Note 23 to the interim condensed consolidated financial statements, there were no related party transactions entered into during the reporting period.

For the six months ended 30 June 2021

# **Principal risks and uncertainties**

Key risks are reviewed by the Audit Committee and the Board of Nostrum on a regular basis and where appropriate, actions are taken to mitigate the key risks that are identified.

The key risks and uncertainties are unchanged from those disclosed in the Group's 2019 Annual Report. The Group believes that its principal risks and uncertainties for the remaining six months are:

### Principal financial risks and uncertainties

Description of risk	Risk management
STRATEGIC RISKS	
Business and market environment	
The Group is exposed to various risks related to the market and external business environment, which are out of the Group's control. Such risks include: • The volatility of commodity prices on the markets;	The Group can transport its crude oil either via rail or pipeline and is selling the majority of its dry gas under a contract referencing export prices which are usually substantially higher than domestic prices.
<ul> <li>The geopolitical, regional situation affecting the Group's areas of operations; and</li> <li>Changes in currency exchange rates.</li> </ul>	To mitigate the geopolitical, regional and customer risks, the Group continues to strengthen customer relationships through establishing long- term off-take agreements whilst also looking at possibilities to geographically diversify its customer portfolio.
The sales prices for the majority of the Group's products are based directly or indirectly on international market prices. Therefore, the Group's future earnings are exposed to the impact of any adverse changes in the market price of crude oil, dry gas and LPG.	In early 2020, given the uncertainties caused by a low oil price environment, the Group took prudent, mitigating actions to protect liquidity. These included cancelling uncommitted capital expenditures and assessment and identifying reductions in operating costs, general and administration and
Crude oil prices are influenced by factors such as OPEC actions, political events and supply and demand fundamentals. Dry gas prices are influenced by the price for dry gas paid by GazProm at the Kazakh border and the prices of various oil-based products. LPG prices are in part influenced by the price of oil but more by supply and demand fundamentals.	selling and transportation costs that could be implemented without having a negative impact on production or operations in the "going concern" period. These actions continue and as a result the Group is now able to withstand a period of prolonged low oil prices. Also, senior management constantly monitors the Group's exposure to foreign currency exchange rate changes and makes plans for necessary measures.
Although oil prices have recovered from their recent low in 2020, continued further volatility could be caused by the ongoing impact that COVID-19 is having on the demand for oil and gas globally.	The Group started to engage with its bondholders in 2020 regarding a possible restructuring of its outstanding bonds. The Group will require its
The Group could also be compelled by governmental authorities, purportedly acting based on Kazakh legislation, to sell its oil, LPG and gas domestically at prices determined by the Kazakh Government, which could be significantly lower than prices which the Group could otherwise achieve.	level of debt to be reduced to a sustainable level. Work continues towards this objective with all stakeholders. However, the negotiations are not yet finalised and so the outcome is uncertain and, to a large extent, outside the control of the Group.
The Group's strategy and business model are not directly influenced by any significant risk resulting from Brexit.	In previous years, the Group has entered into hedging instruments to mitigate the volatility of commodity prices. The last such instrument expired in 2018 at which time the Board resolved that the Group should not enter
Given that the Group's sales prices of crude oil and condensate are based on market prices, the Group's future earnings are exposed to adverse impact by changes in the market price of crude oil.	into further hedging instruments. Accordingly, no further hedging instruments have been entered into since that time.
Filling the Group's spare gas processing capacity	
The activities in the Chinarevskoye oil and gas condensate field are currently the Group's sole source of revenue.	At the end of 2019 the Board concluded that further drilling of the Chinarevskoye field was not cost-beneficial until the identified reservoir risks
In 2019, the Group commissioned additional processing facilities which were constructed in anticipation of future production that the Group has not been able to achieve. As a result, the Group now has significant excess processing capability in its world-class facilities. Unless the ullage can be filled then the Group is at significant risk of not being able to meet the repayment of the restructured bonds.	<ul> <li>had been mitigated. Accordingly, attention turned to sourcing feedstock from alternative sources and repositioning the Group as a mid-stream company with some production and possible upside reserve potential.</li> <li>The Group signed agreements with Ural Oil &amp; Gas LLP in 2018 for the purchase of gas and processing of condensate from the Rozhkovskoye field for a period of four years commencing July 2024.</li> </ul>
Diversification of its sources of feedstock to the processing facilities is considered by the Group to be a way to reduce this risk whilst also providing the Group with an opportunity to gain from expanding the use of available capacities, technological resources and human capital.	Efforts continued to advance discussions with other third parties interested in supplying raw gas to completely fill the spare processing capacity. Discussions continue with interested third parties with a view to processing
The Group's strategic initiatives towards diversification of its sources of feedstock are subject to the customary risks related to counter party delays and non-completion.	third party gas through the gas processing facilities.

Description of risk	Risk management
OPERATIONAL RISKS	
Development of the Group's Oil and Gas Reserves and Oil and gas production	
The activities in the Chinarevskoye oil and gas condensate field are currently the Group's sole source of revenue. However, recent drilling programmes have been unsuccessful and, therefore, at the end of 2019 the Board concluded that further drilling of the Chinarevskoye field was not cost-beneficial until the identified reservoir risks had been mitigated.	A successful well workover and intervention programme was completed in 202 which reduced the rate of decline of production in the year. A similar programm is proposed for 2021. In addition, a low-pressure system, introduced in 2019 an expanded in 2020, continues to allow production from wells that would otherw require to be shut in.
In recent years, the Group has reclassified significant amounts of oil and gas reserves from 2P to Contingency. Production from the Chinarevskoye reservoir continues to decline year- on-year. The Group must identify ways to reduce the rate of decline of the reservoir, either by identifying new production opportunities.	Maintenance of the wells and surface facilities is scheduled in advance, in accordance with technical requirements, and all necessary preparations are performed in a timely manner ensuring a high quality of work. In addition, the Group has emergency response and disaster recovery plans in place and periodically conducts necessary training and testing procedures.
Well workover activities, as well as construction, operation and maintenance of surface facilities, are subject to various risks, including the availability of adequate services, technologies and expertise, which may adversely affect the fulfilment of the Group's strategic objectives.	KPIs in place to monitor risk management in operations include completion of t WOWI programme according to budget and production targets.
Information Security	
Nostrum may be vulnerable to the unauthorized or inappropriate access to data, or the unlawful use, disclosure, disruption, deletion, corruption, modification, inspection, recording, or devaluation of information.	We use a number of dashboards such as MS Secure and MS Compliance. These dashboards monitor security and compliance and identify areas where security might be enhanced.
This includes access to information or disruption to systems through cyber-attack.	We have an Information Security Policy. Each new employee is briefed on the policy at the start of their employment and signs to acknowledge that they understand the contents.
	All mailboxes and data are placed on Microsoft servers with appropriate levels protection. Passwords have cpmplexity requirement and double authorization been introduced.for most users.
	We use anti-virus protection. All traffic is checked by antivirus. All servers and computers have antivirus and any file from any storage device is checked prior opening/start.
	Access to data in data storages is provided to department employees only with approval from the head of the department, and only to data related to the sam department.
	Each employee signs confidential information agreement in HR department up entry into employment together with individual labour agreement.

Description of risk	Risk management
ENVIRONMENTAL, SOCIAL AND GOVERNANCE RISKS	
COVID 19	
COVID-19 remains of the utmost concern. Actions were taken to protect the safety of all staff and contractors and mitigate any impact on operations. No people or production has yet been lost as a result of COVID-19.	<ul> <li>Extensive measures remain in place to protect the safety of employees and contractors and mitigate the impact on operations arising from COVID-19. These include: <ul> <li>Testing of all personnel prior to being transferred to the field;</li> <li>Regular temperature checks whilst at the field site;</li> <li>Isolation and testing of any employees and contractors identified as being in contact with individuals tested as positive for COVID-19;</li> <li>Strict enforcement of maximum personnel quotas in our office in Uralsk as determined by official local and Kazakhstan national directives; and</li> <li>Remote working for all London office personnel from March 2020.</li> </ul> </li> </ul>
Incident rates and Investigation, including risk of explosion	
The Group activities are potentially hazardous and failure to adequately mitigate against these hazards can have a broad range of results, including, but not limited to, injury of employees or local residents, fires and explosions at facilities, business interruption and occupational diseases. It should also be noted that the legal framework for operational safety is not yet fully developed in Kazakhstan and, given the changing nature of environmental regulations, there is a risk that the Group will not be in full compliance with all such regulations at all times.	<ul> <li>The Group's QHSE policies are periodically revised to ensure compliance with changes and new requirements in this area.</li> <li>Periodic training on the requirements of policies and regulations are held for employees. In addition, at the supplier selection and contracting stage, the Group places a high degree of importance on a supplier's resources and ability to comply with the Group's QHSE requirements and the Group's dedicated team in this area conducts supplier audits.</li> <li>Key lost time injuries indicators are reported to senior management on a monthly basis. All incidents are investigated, their causes identified and corrective action plans developed.</li> <li>A system of Hazard Observation Cards has been developed and implemented to augment our Golden Rules which were redrafted and reintroduced in 2019. Staff are actively encouraged to submit Hazard Observation Cards.</li> <li>Management KPIs include lost time injury frequency, total recordable injury frequency and numbers of Hazard Observation Cards submitted.</li> </ul>
Governance	
The Group is a primary listed entity and as such must have extensive governance procedures and policies in place. Lack of such policies or a failure of a policy to operate effectively could lead to significant fines, penalties and reputational damage. In addition, any perceived weakness in governance policies and procedures, for instance through sun-optimal and public assessment by an ESG rating agency and comparison to peers, might adversely impact the Group's ability to raise additional finance.	The Group has an extensive range of policies that are designed to ensure that all required compliance obligations are met. The HSEC committee currently has responsibility for ESG related matters. A review of the Group's public ESG related information is being conducted to identify and rectify gaps.
Environment	
Environment risks are those stemming from, for example, more intense extreme weather events, rising energy intensity in the oil and gas industry, the changing regulatory landscape, the risk of fugitive emissions and climate change policies driving down the demand. In addition, any perceived weakness in environment related policies, procedures and efforts, for instance through sun-optimal and public assessment by an ESG rating agency and comparison to peers, might adversely impact the Group's ability to raise additional finance.	<ul> <li>The Group actively plans and manages projects designed to mitigate certain environment-related risks. Limiting Green House Gas emissions is a management KPI.</li> <li>In operations there is a permanent effort and commitment improve energy efficiency and to reduce flaring, venting and leaks and to monitor and effectively manage emissions and waste</li> <li>At campsite, most of the water the Group utilises now is recycled.</li> <li>The Senior Management Team actively evaluates opportunities to further adapt and implement cost-effective mitigation measures.</li> <li>The HSEC committee currently has responsibility for ESG related matters. A review of the Group's public ESG related information is being conducted to identify and rectify gaps.</li> </ul>

Description of risk	Risk management
COMPLIANCE RISKS	
Subsoil use agreements	
As the Group performs exploration, development and production activities in accordance with related licences for the oil and gas fields, there are related risks that the Group might not be able to obtain extensions when necessary, risks of non-compliance with the licence requirements owing to ambiguities, risks of alteration of the licence terms by the authorities and others. These risks may result in the Group's inability to fulfil scheduled activities; fines, penalties, suspension or termination of licences by authorities; and, respectively, significant and adverse impact on the Group's business, financial performance and prospects.	The Group has procedures and processes in place for the timely application for extension of licence periods when it is considered appropriate however, uncertainty remains in relation to timing and results of decisions of authorities. The Group maintains an open dialogue with Kazakh governmental authorities regarding all of its subsoil use agreements. In the event of non-compliance with a provision of any such agreement, the Group endeavours to have such terms modified and pays any penalties and fines that may apply.
Compliance with laws and regulations	
The Group carries out its activities in a number of jurisdictions and, therefore, must comply with a range of laws and regulations, which exposes the Group to the respective risks of non-compliance. In addition, the Group must comply with the Listing Rules, the Disclosure Guidance and Transparency Rules, FRC guidance and requirements, as well as KASE and bond indenture requirements, in light of its publicly traded shares and notes. Hence, there are non-compliance risks, including reputational, litigation and government sanction risks, to which the Group is exposed. The impact of these risks may vary in magnitude and include regulatory actions, fines and penalties by authorities, diversion of management	For the purpose of compliance with laws, regulations and rules, the Group has adopted a number of policies including a code of conduct, inside information and disclosure policy, related party transactions policy, code for dealing in securities, Anti-Corruption and Bribery Policy, a Whistle-Blowing Policy and a Human Rights Policy. The Group also performs periodic updates based on the changes in regulatory requirements and carries out related communications and training for employees. Necessary communication lines are established with authorities to ensure timely and adequate inbound and outbound flow of information.
time, and may have an overall adverse effect on the Group's performance and activities towards achieving its strategic objectives.	Management and the Board monitor significant matters related to legal and compliance matters in order to act promptly in response to any actions.
	The Group continuously monitors its compliance with its policies on the level of authorisations for transactions. In addition, the management maintains an open dialogue with its sponsors in relation to any matter related to non-compliance with Listing Rules and other regulatory requirements.

	- 1	<b>5</b> 1
Description of risk		Risk management
FINANCIAL RISKS Liquidity risks		
Forecasting to maintain an adequate liquidity position is subject to the risk that inaccurate information or assumptions are used for the forecasts, and to risks of counterparty delay or a counterparty's failure to meet their contractual obligations owing to severe market conditions. The actions of OPEC in 2020, augmented by the impact of COVID-19, highlight these risks, and have contributed to significant commodity price volatility in 2020. Significant negative movement in world energy prices could result in the Group's liquidity position becoming more strained than the severe but plausible downside scenario in the Going Concern assessment.		Management and the Board constantly monitor the Group's actual and forecast liquidity position to ensure that sufficient funds are available to meet any commitments as they arise. KPIs in place for 2021 to manage G&A and operational costs below \$43.4 million.
Refinancing risks		
The Group has US\$1.25bn of debt outstanding, US\$725m of which matures in July 2022. In March 2020, the Group announced that it was appointing advisers to engage with bondholders and other stakeholders to restructure the debt. On 23 October 2020, the Group announced that it has entered into a Forbearance Agreement with an informal ad-hoc committee of noteholders. The ability of the Group to refinance the outstanding debt represents a material uncertainty. There is a significant risk that the Group will not be able to refinance the bonds which will negatively impact the Group's ability to continue as a going concern.		Successful restructuring of the Group's outstanding debt is the premier focus of the Board and Senior Management Team. The Group will require the level of debt to be reduced to a sustainable level. Work continues towards this objective with all stakeholders. However, the negotiations are not yet finalised and so the outcome is uncertain and, to a large extent, outside the control of the Group. The Board has established a KPI to complete the restructuring with all approvals by the end of 2021.
Tax risks and uncertainties		
The uncertainty of application, including retroactive application, of tax laws and the evolution of tax laws in Kazakhstan create risks related to additional tax liabilities from assessments and risks related to the recoverability of tax assets. Tax risks and uncertainties may adversely affect the Group's profitability, liquidity and planned growth.		The Group has policies and procedures related to various tax assessments and positions, as well as other control activities to ensure the timely assessment and filing of tax returns, payment of tax obligations and recovery of tax assets. The Group regularly challenges, either with the Kazakh tax authorities or through the Kazakh courts, tax assessments that it believes are inapplicable to it, pursuant to the terms of either its subsoil use agreements or applicable law.
CLIMATE CHANGE RISKS		
Climate change		
Climate change risks is the group of risks including those stemming from more intense extreme weather events, rising energy intensity in the oil and gas industry, the changing regulatory landscape, the risk of fugitive emissions and climate change policies driving down the demand. The risk of more intense extreme weather events, for example, may lead to the following sub-risks: • Risks of reduced asset operation; • Risks of higher fuel prices; • Risks of higher insurance premiums; and • Risks of disruptions to supply chains.		<ul> <li>The Group is actively planning and managing projects designed to mitigate certain climate change related risks. For instance:</li> <li>To decrease its exposure to rising fuel prices it retooled drilling rigs to derive more power from electricity rather than diesel;</li> <li>In operations there is a permanent effort and commitment improve energy efficiency and to reduce flaring, venting and leaks; and</li> <li>At campsite most of the water the Group utilises now is recycled.</li> <li>Climate change is on the Board's agenda. The Senior Management Team actively evaluates opportunities to further adapt and implement costeffective mitigation measures.</li> </ul>
OTHER RISKS		
Other significant risks	$\square$	
Other risks are those that are not specifically identified within any of the principal risks and uncertainties but may be related to several such areas or be organisation wide. These include risks related to: • Global pandemics, such as COVID-19; • Fraudulent activities;		The Group is currently adapting to the changing regulations surrounding COVID-19 and will have a policy to deal with future pandemics once the current pandemic is over. The Group is complying with all Government recommendations in the countries where it has offices and employees. The Board monitors the further development of the business continuity plan and its implementation to the extent required by the circumstances.

For the six months ended 30 June 2021

The risks listed above do not comprise all those associated with the Group's business and are not set out in any order of priority. Additional risks and uncertainties not presently known to management, or currently deemed to be less material, may also have an adverse effect on the Group's business. The risks listed above are continuously monitored by the management team and assessed when making business decisions.

For the six months ended 30 June 2021

## **Going concern**

The Group monitors on an ongoing basis its liquidity position, near-term forecasts and key financial ratios to ensure that sufficient funds are available to meet its commitments as they arise and liabilities as they fall due. In addition, since April 2020, the Group has performed regular sensitivity tests of its liquidity position for changes in product prices, production volumes and any other significant variables. Whilst looking for new opportunities to fill the spare capacity of the Group's infrastructure, the Directors are also focused on a range of actions aimed at improving the liquidity outlook in the near-term. These include efforts to restructure the Notes, as well as further cost optimization to reduce capital expenditures, operating costs and general and administration cost.

The Directors have also considered any additional risks to liquidity posed by COVID-19. Oil and gas production has been classified as an essential business in Kazakhstan and operations are continuing. Contingency plans have been put in place both to protect the workforce and ensure that there are sufficient personnel to continue operations. There was no loss of production as a result of COVID-19 in 2020 and the reporting period. Therefore, the Directors have concluded that there is currently no material impact on the Group's operations and liquidity at the time of publication of this interim management report as a result of COVID-19. However, it is recognized that there is uncertainty around future developments of COVID-19 which may affect the Group's ability to deliver the forecast production over 2021 and 2022.

In March 2020, following the collapse in the oil price, the Group announced that it would seek to engage with its bondholders regarding a possible consensual restructuring of the Notes.

In May 2020, the Group appointed a financial adviser and a legal adviser in connection with this, and in July 2020 announced that it planned to utilise the applicable grace periods with respect to the Notes for the interest payments due on 25 July and 16 August 2020. The 30-day grace period was to allow the Company to continue active discussions between the financial and legal advisers and an informal ad-hoc committee of noteholders (AHG) with a view to entering into a forbearance agreement with the holders of the Notes in relation to those interest payments.

On 23 October 2020, the Company announced that, together with certain of its subsidiaries (Note Parties), it had entered into a forbearance agreement with members of the AHG.

Pursuant to the Forbearance Agreement, members of the AHG have agreed to forbear from the exercise of certain rights and remedies that they have under the indentures governing the Notes. The agreed forbearances include agreeing not to accelerate the Notes' obligations as a result of the missed interest payments (or the next missed interest periods if they occur prior to the expiry of the Forbearance Agreement).

The Forbearance Agreement was subject to certain conditions, including:

- Any representation or warranty made by any of the Note Parties under the Forbearance Agreement continuing to be true and complete in all material respects as of the date of the Forbearance Agreement;
- The opening of a secured account into which a portion of the missed interest payments was paid. At the date of this interim management report, the full amount of US\$21,541,990 required by the Forbearance Agreement has been transferred into secured account and is treated as restricted cash;
- The appointment by the AHG of an observer who shall be entitled to attend and speak, but not vote, at any meetings of the Board or Committees of the Company where certain defined matters are to be discussed;
- The engagement of certain professional and technical advisors on behalf of the AHG;
- The observance by the Company and its subsidiaries of certain operating and other restrictions and limitations; and
- The provision of certain financial and operating information to the advisors of the AHG.

The company agreed to pay, or procure payment of, certain consent fees in cash (Consent Fee) to each forbearing holder. The Consent Fees were payable by reference to the total aggregate principal amount of the Notes outstanding. The first Consent fee for the first 90 days of 29.7866 basis points, totalling US\$3,350,992, was paid on 19 November 2020. The second Consent Fee of 19.8577 bps, totalling US\$2,233,991, was paid on 22 December 2020. The final consent fee of 9.9288 bps, equating to US\$1,116,990, was paid on 20 February 2021. On each occasion, consent fees were paid to all of the total bondholders who agreed to forbear, equating to approximately 90% by value of each series of the Notes and evidencing an engaged and supportive creditor group. Further details of the forbearance agreement are disclosed in Note 1 to the interim condensed consolidated financial statements.

On 19 March 2021, by unanimous consent of the AHG, the forbearance period was extended to 20 April 2021. On 20 April 2021, again by unanimous consent of the AHG, the forbearance period was extended to 20 May 2021.

On 19 May 2021, the Note Parties entered into a second forbearance agreement (the "Second Forbearance Agreement" and together with the Forbearance Agreement, the "Forbearance Agreements") with the AHG. The Second Forbearance Agreement is valid from the expiry of the Forbearance Agreement, is substantially similar to the Forbearance Agreement and initially expired at 4 p.m. GMT on 21 June 2021 on which date by unanimous consent of the AHG, the forbearance period was extended to 21 July 2021. On 21 July 2021, again by unanimous consent of the AHG, the forbearance period was extended to 25 August 2021. In connection with the extension of the forbearance agreement, the Company has agreed to pay into the secured account established in connection with the forbearance agreement an amount of US\$1,116,990, equating to 9.9288 bps of the outstanding Notes.

The extensions were to provide more time for a lock-up and restructuring agreement to be reached with bondholders and potentially with other stakeholders. At the time of publication of this interim management report, negotiations with members of the AHG continue. The final form of the lock-up agreement and associated restructuring agreement is anticipated to be concluded in the near future. The key terms relevant to the consideration of going concern are that the debt will be foregone materially and interest on the restructured debt will partially be paid in cash and partially rolled up into the debt. As part of the agreement, it is likely that additional equity will be issued to bondholders, in which case significantly diluting the interests of the current equity holders.

Whilst the Group remains confident that agreement can be reached, discussions with bondholders, shareholders and the Government of the Republic of Kazakhstan to restructure the Notes, and the applications to obtain requisite approvals and consents have not yet concluded and so the outcome is uncertain and outside of the Group's control.

The Directors' going concern assessment is supported by future cash flow forecasts. The base case going concern assessment reflects production forecasts consistent with the Board approved plans and published guidance and assumes a Brent oil price of \$65 /bbl for the second half of 2021 and all of 2022. The

For the six months ended 30 June 2021

forecast financing cashflows assume that the Notes are restructured in the form envisaged by the current restructuring terms being discussed with the advisors to the AHG, reflecting the terms outlined above.

Therefore, in forming an assessment on the Group's ability to continue as a going concern, the Board has made significant assumptions about:

- A restructuring of the Notes being agreed with the AHG and subsequently with sufficient bondholders consistent with the restructuring terms currently being discussed with the advisors to the AHG, that is affordable for the Group through the going concern period to 30 September 2022. Should the Group be unable to reach an agreement with the AHG by the end of the forbearance period, then bondholders may seek to enforce their rights under the bond indentures, including accelerating the Notes' obligations as a result of the missed interest payments; and
- If agreement is reached with the AHG and subsequently with sufficient bondholders, the Group being able to obtain the necessary permissions and waivers. Specifically, the Group may need to obtain permission for the proposed restructuring from its shareholders and will need to obtain permission for the restructuring and secure a waiver from the Government of the Republic of Kazakhstan. If agreement is reached with the bondholders but the Group is unable to obtain the necessary approvals and waivers, then the agreement with bondholders may not be implementable.

These assumptions represent material uncertainties that may cast significant doubt on the Group's ability to continue as a going concern for the going concern period to 30 September 2022, being not less than 12 months from the date of this report.

After careful consideration of these material uncertainties, and on the assumption that a restructuring of the Notes to an affordable level is completed, the Directors have a reasonable expectation that the Group has sufficient resources to continue in operation for the going concern period to 30 September 2022, being a period of not less than 12 months from the date of this interim management report. For these reasons, they continue to adopt the going concern basis in the accompanying interim condensed consolidated financial statements. Accordingly, the accompanying interim condensed consolidated financial statements do not include any adjustments to the carrying amount or classification of assets and liabilities that would result if the Group were unable to continue as a going concern.

For the six months ended 30 June 2021

# **Responsibility statement**

To the best of our knowledge

- a) the interim condensed set of financial statements, which has been prepared in accordance with the International Accounting Standard 34, "Interim Financial Reporting", as adopted by the European Union, gives a true and fair view of the assets, liabilities, financial position and profit or loss of the issuer, or the undertakings included in the consolidation as a whole as required by DTR 4.2.4 R;
- b) the interim management report includes a fair review of the information required by DTR 4.2.7 R; and
- c) the interim management report includes a fair review of the information required by DTR 4.2.8 R.

The interim management report and the interim condensed consolidated financial statements for the six months ended 30 June 2021 have not been audited nor reviewed by the Group's external auditor.

# Interim condensed consolidated statement of cash flows

		For the six months	ended 30 June
In thousands of US Dollars	Notes	2021 (unaudited)	2020 (unaudited)
Cach flow from encycling activities:			
Cash flow from operating activities: Loss before income tax		(34,426)	(51,117)
		(34,420)	(51,117)
Adjustments for:			
Depreciation, depletion and amortisation	16,17,18	35,636	42,941
Finance costs	20	53,625	47,188
Employee share option plan fair value adjustment		-	(373)
Interest income		(112)	(171)
Foreign exchange gain on investing and financing activities		(66)	(12)
Loss on disposal of property, plant and equipment		-	8
Operating profit before working capital changes		54,657	38,464
Changes in working capital:			
Change in inventories		1,063	4,823
Change in trade receivables		(4,994)	16,808
Change in prepayments and other current assets		(318)	3,456
Change in trade payables		531	(8,573)
Change in advances received		(166)	(106
Change in due to Government of Kazakhstan		(515)	(515
Change in other current liabilities		(1,703)	(5,790)
Cash generated from operations		48,555	48,567
Income tax paid		(2,260)	(1,576)
Net cash flows from operating activities		46,295	46,991
Cash flow from investing activities:			
Interest received		112	171
Purchase of property, plant and equipment		(2,887)	(18,146
Exploration and evaluation works		-	(184
Advances for non-current assets		(230)	(518
Transfer to restricted cash		(8,634)	-
Net cash used in investing activities		(11,639)	(18,677
Cash flow from financing activities:			(
Finance costs paid		-	(43,000
Other finance costs		(3,780)	-
Payment of principal portion of lease liabilities		(1,443)	(3,211)
Finance charges on lease liabilities		(174)	(256)
Net cash used in financing activities		(5,397)	(46,467)
Effects of exchange rate changes on cash and cash equivalents		212	(87
Net increase / (decrease) in cash and cash equivalents		29,471	(18,240
Cash and cash equivalents at the beginning of the period	9	78,583	93,940

"Other finance costs" primarily represent bondholder consent fees paid in February 2021 in relation to the Forbearance Agreement in the amount of US\$1,117 thousand and advisor fees of US\$2,600 thousand paid by the Group in relation to the ongoing discussions with its bondholders regarding a possible restructuring of the Group's Notes. For more details on the Forbearance Agreements and the consent fees see Note 1.

The accounting policies and explanatory notes on pages 27 through 35 are an integral part of these interim condensed consolidated financial statements
