

***Press release****Astana, July 10, 2023***The operation of oil pumping stations of “KazTransOil” JSC, temporarily stopped due to a power outage, has been fully restored**

After stabilization of the supply of electricity by the energy transmission organization, the operation of oil pumping stations (OPS) of “KazTransOil” JSC in Atyrau and Mangistau regions, temporarily stopped due to a power failure, was fully restored. Transportation of oil through the system of main oil pipelines of “KazTransOil” JSC is carried out in the specified technological modes. “KazTransOil” JSC confirms the availability of technical feasibility for the transportation of oil in full in accordance with the oil supply schedule approved by the Ministry of Energy of the Republic of Kazakhstan. However, the actual volumes of oil transportation depend on the applications of oil companies.

On July 3, 2023, as a result of an emergency shutdown of power unit No. 1 of the thermal power plant of MAEK LLP, there was a disruption in the power supply to consumers of the Mangistau and Atyrau power centers of the Western Zone of the UEP of Kazakhstan. As a result of systemic accidents, unscheduled shutdowns occurred at nine OPSs, and temporary restrictions were imposed at twelve OPSs of “KazTransOil” JSC.

***For reference:***

*“KazTransOil” JSC is the national operator of the main oil pipeline. It is part of the NC “KazMunayGas” JSC group. “KazTransOil” JSC owns a diversified network of main oil pipelines 5.4 thousand km in length.*
