

Press release

Astana, October 16, 2026

KazTransOil reduces energy consumption by 2.5% in the first nine months of 2026

In the first nine months of 2026, KazTransOil JSC reduced its total energy consumption by 2,260 tonnes of coal equivalent (tce), or 2.5%, compared with the same period in 2025.

Over the reporting period, specific energy consumption per million tonne-kilometres of oil transported decreased to 3.3 tce, down from 3.4 tce in the first nine months of the previous year.

The economic benefit from reducing specific energy consumption during the reporting period amounted to KZT 354.919 million.

KazTransOil JSC also achieved substantial savings in petrol and diesel fuel consumption in the first nine months of 2026. Petrol consumption decreased by 22.5 tonnes, or 15%, compared with the same period last year, while diesel fuel consumption fell by 293.5 tonnes, or 11.6%.

KazTransOil JSC continues to implement energy management initiatives and pursue a systematic approach to improving energy efficiency. These efforts help reduce energy consumption and optimise operating costs across the main oil pipeline system.

KazTransOil JSC is the national operator of the main oil pipeline system. It is a subsidiary of KazMunayGas NC JSC. The company owns a diversified network of main oil pipelines with a total length of 5,200 km and provides pipeline operation services for third-party organizations, covering an additional 5,000 km of pipelines.
