KazTransOil’s Georgian subsidiary improves energy efficiency in the first nine months of 2026

In the first nine months of 2026, Batumi Oil Terminal LLC (BOT), a subsidiary of KazTransOil JSC, reduced electricity consumption by 23.1% and natural gas consumption by 41.8% compared with the same period in 2025.

BOT’s electricity consumption totalled 6.599 million kWh in the first nine months of 2026, down from 8.585 million kWh in the corresponding period of 2025, a reduction of 1.986 million kWh.

Natural gas consumption also decreased substantially, falling to 5.527 million cubic metres from 9.501 million cubic metres in the first nine months of 2025, a reduction of 3.974 million cubic metres.

Specific electricity consumption per tonne of petroleum products handled at BOT decreased to 2.29 kWh per tonne, compared with 3.08 kWh per tonne in the same period of 2025, representing a reduction of approximately 26%.

Specific natural gas consumption per tonne of cargo handled fell to 4.62 cubic metres, down from 6.59 cubic metres in the first nine months of 2025, a decrease of approximately 30%.

The economic benefit generated by energy savings from January to September 2026 amounted to USD 1.617 million.

These improvements in energy efficiency reflect BOT’s consistent efforts to use energy resources more efficiently, optimise production processes, adopt modern approaches to managing technological operations and upgrade equipment.

Batumi Oil Terminal LLC (BOT) is a wholly owned subsidiary of KazTransOil JSC. Through BOT, KazTransOil JSC directly owns and manages its operating assets in Georgia.
