Astana, October 22, 2026

Batumi Sea Port increases cargo throughput by 13% in the first nine months of 2026

In the first nine months of 2026, total cargo throughput at Batumi Sea Port reached 6.25 million tonnes, up 13% year on year.

The positive trend was driven by higher throughput across all major cargo categories, including dry bulk, containerised, ferry and liquid bulk cargoes.

From January to September 2026, dry bulk cargo throughput totalled 1.434 million tonnes, an increase of 7% compared with the same period in 2025.

Container cargo throughput recorded particularly strong growth, reaching 2.984 million tonnes, up 17% year on year.

Ferry cargo volumes totalled 402,000 tonnes in the reporting period, a 54% increase compared with the first nine months of 2025. This growth was supported, among other factors, by the introduction of an additional ferry service on the Constanța–Batumi route, operating once a week.

Liquid bulk cargo throughput amounted to 1.429 million tonnes, an increase of 5% compared with the same period last year.

Overall, Batumi Sea Port recorded positive year-on-year growth across all major cargo categories in the first nine months of 2026. These results reflect stronger operational performance and the continued development of this overseas asset of KazTransOil JSC.

KazTransOil JSC directly owns and manages its operating assets in Georgia through Batumi Oil Terminal LLC (BOT). BOT holds the exclusive rights to manage a 100% ownership interest in Batumi Sea Port LLC.
