Main Water Pipeline LLP reduces electricity consumption by 15.3% in the first nine months of 2026

Main Water Pipeline LLP (MWP), a subsidiary of KazTransOil JSC, reduced electricity consumption for water transportation through the Astrakhan–Mangyshlak main water pipeline by 8.783 million kWh in the first nine months of 2026 compared with the same period in 2025.

During the reporting period, electricity consumption for water pumping totalled 48.773 million kWh, down from 57.556 million kWh in the first nine months of 2025, representing a 15.3% reduction.

Specific electricity consumption for water pumping also decreased by 0.1 kWh per cubic metre, or 3.8%.

The economic benefit generated by these energy-saving measures exceeded KZT 213.429 million.

MWP’s progress in energy efficiency was driven by improvements to production processes, optimisation of equipment operating modes and the efficient use of energy resources.

These efforts form part of the ongoing work across the KazTransOil JSC group to improve energy efficiency and advance sustainable development practices.

KazTransOil JSC holds a 100% ownership interest in the charter capital of Main Water Pipeline LLP, which owns the Astrakhan–Mangyshlak main water pipeline.
