Primary market sector

No deals were made in this sector of KASE during the analyzed period. No offerings were made.

Secondary market sector (purchase and sale)

A total of 423 deals amounting to \$179,915.0 th. or KZT21,905.4 m. were made in shares during the analyzed period. In comparison with the previous period (May 24-30, 448 deals, \$60,600.4 th. or KZT7,348.2 m.), turnover of the sector has increased 3.0 times. During the analyzed period on KASE, 5.0% operations in quantitative expression and 10.7% in volumetric were nego. In the previous period these indicators made 2.0% and 2.1%.

During the analyzed period deals were made by (in the parenthesis are given comparable indicators of the previous period) KASE's 39 (42) members on 33 (32) instruments. At that: 7.7% (6.8%) of gross-turnover of the market – 4.7% (2.5%) on purchasing transactions and 10.7% (11.1%) - on sales transactions were controlled by "pensions"; through the depot accounts, registered on physical persons for the week had passed 17.0% (26.8%) of exchange's turnover of shares – 17.9% (36.2%) - on purchasing transactions and 16.1% (17.3%) - on sales transactions.

In the described period weighted average daily prices of 45% (34%) of names of shares involved into deals, made on KASE by methods of opened trades grew, prices of 39% (55%) – fell, prices of 16% (7%) – remained unchanged. In the described period shares prices changed positively in the range from 0.39% (TSBN) to 290.4% (RMRX), negative change – from 0.2% (RDGZ) to 17.1% (ATFBp).

Analyzed week had become successful for holders of majority of shares – favorites of market. The most interesting looked common shares of Kazkommertsbank JSC (KKGB), Temirbank JSC (TEBN) and ATFBank JSC (ATFB). For example, the given week was record for ATFB. Having opened on May 31 at the rate KZT12,650 the market of this security had reached on June 4 its historical maximum – KZT14,000. However the publication on June 4 of decision of Board of directors of bank about cancellation of offering of common shares in the frames of earlier planned widening of authorized capital of ATFBank JSC, had provoked the decrease of rate of ATFBank JSC for two days more than by 14.3% even with minimal volume of their supply.

At the same time preferred shares of ATFBank JSC (ATFBp8) appeared in the leaders of liquidity (59 deals) and growth of price (+25.3%) among favorites. The given instrument is very interesting for brokers for 2 months, and its rate every week takes the new historical maximums. It can be explained by the rumor about intention of the issuer to transform the given securities to converted. But there are no official confirmations about it.

Despite the relatively low liquidity in analyzed period, common shares of Kazkommertsbank JSC (KKGB) increased by 7.6%, punching by it the upper limit of horizontal channel (KZT1,300), in which their market was during most part of spring. The given fact is caused by growth of prices of GDR of Kazkomemrtsbank on LSE, where the market had worked the effect from recently presented by bank results of its activity in the first quarter of the current year.

Detailed results of trades in shares on KASE are given in the table.
