### *Primary market sector*

A total of 421 deals were made in shares during the analyzed period. Average daily volume made \$14,756.9 th. or KZT1,780.7 m. and increased compared to previous period (previous week weighted average volume made \$12,372.6 th. or KZT1,492.7 m.) by 19.3 %. At the same time 1.4% of operations in quantitative and 0.7 % in volumetric expression were nego. In the previous period these indexes made 1.0 % and 9.5 % correspondingly.

During the analyzed period deals were made by (in the parenthesis are given comparable indicators of the previous period) KASE's 37 (35) members. In deals 25 (28) denominations of shares were included. At that: 5.8% (3.7%) of gross-turnover of the market – 7.4% (4.2%) on purchasing transactions and 4.3% (3.2%) - on sale transactions were controlled by pension market subjects; 42.1% (73.7%) of gross-turnover of shares – 38.2% (75.0%) - on purchasing transactions and 46.0% (72.3%) - on sales transactions went through the depo accounts, registered on physical persons during the week. At that 3.6% (3.1%) of gross-turnover – 3.3% (5.6%) on purchase and 3.9% (0.7%) on sales transactions went through accounts of non-residents.

In the described period weighted average daily prices of 40% (32%) of names of shares involved into deals, made on KASE by methods of opened trades grew, prices of 44% (43%) – fell, prices of 16% (18%) remained unchanged. In the described period shares prices changed positively in the range from 0.29% (CCBN) to 19.54% (MMGZp), negative change – from 0.04% (NFBN) to 13.75% (KZIS).

Within the describing period the growth of average weighted day prices was demonstrated by 40 % (32 %) titles of debt instruments, involved into deals, fall – 44 % (43 %), the stable rate – 16 % (18 %). Positive change was average weighted prices for shares was observed in the range from 0.29 % (CCBN) to 19.54 % (MMGZp), negative – from 0.04 % (NFBN) to 13.75 % (KZIS).

KASE index had added 1.15% by results of the week, having closed on Wednesday at the rate of 2,693. From the viewpoint of technical analysis this indicator managed to hold over the support level, which we are estimating at 2,650. however on June 10 happened the breakage of this level, which was liquidated on the next day by the rapidly growing KAZAKHMYS PLC (GB\_KZMS). Almost 9 %-ge growth of this instrument was caused by the recent news that the company had purchased from the government of Kazakhstan in exchange to its shares 7.66% shares of ENRC, having increased its share to 22.24% (see above). The investors are already observing the situation with these two companies. Initially, ENRC was planning to take-over the Kazakhmys, but then, after the refusal, the rumors about the deal appeared on the marker, but the purchaser in this deal will be KAZAKHMYS PLC.

In addition to that, shares of Kazakhtelecom JSC continued their growth. Most likely, it is connected to two factors: first of all, recently had taken place the dividends' payment on common shares, secondly, the investors are observing with the interest over the aggressive strategy of the company for entering the cell connection market.

Main factors, from our point of view, are already worked up by the market this week. So we are waiting for KASE index shifting in the limits of horizontal channel.

Detailed results of trades in shares on KASE are given in the table.
